# quaeris

Data. Decisions. _Results._

The Natural Language Platform Driven by AI

Discover actionable insights in the most intuitive way possible

Why Quaeris?

When you can access insights like never before, you'll understand your business like never before.

Ask questions of your data and get actionable insights instantly

Quaeris is AI-driven data search and BI platform that delivers personalized insights through an intuitive experience. Our proprietary AI-engine empowers business users to ask questions, receive answers, and share results – all within seconds.
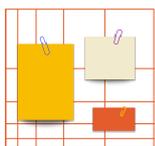

Ask questions, naturally, like Google for your corporate data

With written and voice support, obtaining insights is as easy as using Google. No pre-build, curated or managed dashboards needed.

Receive personalized, contextual and recommended answers

Quaeris learns from your interactions to deliver personalized and recommended results based on your interests, role, and history.
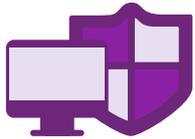

Pin meaningful insights, like Pinterest

Quaeris provides near real-time results on any data and allows you to pin insights that matter to you. Build your personalized pinboard in minutes.

Embrace LinkedIn-like collaboration

Share insights and collaborate one-on-one or with the whole team in real-time. When everyone collaborates, driven decision making trumps opinions.
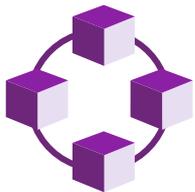

Robust Security, Scalable Architecture

Platform Security

Best-in-class security protocols to ensure your data remains secure.

- Support integrations with your identity providers
- Role based access to your information
- Full governance and compliance with audit trails
- Enterprise SSO solutions

Platform Architecture

**Quaeris is built to compliment your data stack.**

- Fully containerized system on Kubernetes
- Connect Quaeris to any structured data
- Support web and mobile platforms
- Micro-services architecture
- No need for data movement

Quaeris Logical Architecture
